

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

- WORDEN, James Perry; b, Hastings-on-Hudson, My 25, 1866; CC, 95; UTS, 95-6; Europe, 96-8.
- WORLEY, John Cobb; b, Mt Hope, Mo, Ap 21, 1872; MoVC, 94; UTS, 95-7.

STATISTICAL TABLES, 1837-1897.

The accompanying tables have been prepared in order to show the contributions of the Union Theological Seminary to the cause of evangelization through the ordained ministry of the American churches and through the work of foreign missionaries. The second table shows the contributions made in the interest of education in various departments— theological, collegiate, and preparatory. The columns showing the honorary degrees conferred upon the alumni of the Seminary will serve, in some measure, as an indication of the eminence attained by them.

The table showing ordinations takes account only of the branch of the Christian church into which the student was first inducted after leaving the institution. It has not been possible to take account of subsequent changes in ecclesiastical connection or of present relation.

With regard to the 431 given as unordained, it will be noted that 83 died during or soon after their theological course, or were prevented from entering the work of the ministry by permanent ill-health or similar providential cause. The net total of unordained should therefore be reduced to 348, or a little over 12 per cent. The number of ordinations, 2,465, constitutes nearly 85.12 per cent. of the total registration during the first sixty-one years of the history of the institution, and this number and percentage will be somewhat increased by changes to occur in the last few classes in the course of a few months.

The number of students who have entered the various Presbyterian churches was 1,428, and those who entered the Reformed churches numbered 98; together constituting nearly 53 per cent. of the total. All other churches received a little less than 32½ per cent. The foreign missionaries constitute 7.22 per cent. of the total number, or almost 8½ per cent. of those who were ordained.

With regard to those who have been engaged in educational labor it should be stated that the same name may appear in more than one column, the individual at different periods of his career having been both a teacher and a principal, a college professor and a college president or a seminary professor. Some of those classed as physicians never practised medicine, though they acquired medical degrees, and others became medical missionaries. Some of the business men and lawyers had been ordained as ministers.

The following résumé of the tables present the information in a different form:

NUMBER OF STUDENTS.

Number of graduates holding diplomas.....	1,836
Number of special or partial-course students.....	1,060
Total number of matriculated students.....	2,896
Number of students known to be deceased.....	817
Number of students unknown	58— 875
Number of students supposed to be now living.....	2,021

ORDINATIONS.

Presbyterian Church, U. S. A., New School.....	514
